

# ***New Acquisition Initiatives and Implementation for Systems Engineering***

**20 April 2010**

**Director, Mission Assurance**

**Systems Engineering**

**Office of the Secretary of Defense**

# Department of Defense

**Soldiers, Sailors,  
Airmen, Marines**

- We are a nation at war
- Over 1.3 million active duty men and women
- Over 684,000 civilians
- Over 1.1 million Guard & Reserves

- DoD Mission:**
- Provide the military forces needed to deter war
  - Protect the security of our country

# Key DoD Themes

- 1. Take care of our people**
- 2. Rebalancing the Military**
- 3. Reforming what and how we buy**
- 4. Supporting our troops in the field**

***Secretary of Defense***  
***HASC Budget Rollout Brief***  
***February 2010***

# Rebalance the Force 2010 Quadrennial Defense

## Review

- 1. Defend the United States and Support Civil Authorities at Home**
- 2. Succeed in Counterinsurgency, Stability, and Counterterrorism Operations**
- 3. Build the Security Capacity of Partner States**
- 4. Deter and Defeat Aggression in Anti-Access Environments**
- 5. Prevent Proliferation and Counter Weapons of Mass Destruction**

# Our Guidance

- **Quadrennial Defense Review Executive Summary, February 2010**
  - ***Further rebalance the capabilities of America's Armed Forces to prevail in today's wars, while building the capabilities needed to deal with future threats***
  - ***Further reform the Department's institutions and processes to better support the current needs of the warfighter; buy weapons that are usable, affordable and truly needed; and ensure that taxpayer dollars are spent wisely and responsibly***
  - ***Preserve and enhance the All-Volunteer Force***
  - ***Improve how it matches requirements with mature technologies, maintains disciplined systems engineering approaches, institutionalizes rapid acquisition capabilities, and implements more comprehensive testing***
- **Quadrennial Defense Review Report Preface**  
**Secretary of Defense Robert M. Gates, February 2010**
  - ***United States needs a broad portfolio of military capabilities with maximum versatility across the widest possible spectrum of conflict***

# Perspective for the Next Decade

1950 1960 1970 1980 1990 2000 2010 2020

**Cold War**

**Vietnam War**

## Problem Identification

## Solution Matching

## Implementation Tools

## Transition

Role of Systems Engineering in Rapid Fielding?

# Support for Change

## Weapon Systems Acquisition Reform Act of 2009 (Public Law 111-23)

- Establishes *Director, Systems Engineering* as principal systems engineering advisor to the SECDEF and the USD(AT&L)
- Requires Congressional reporting on Systems Engineering Capabilities and MDAP achievement of measurable performance criteria
- WSARA signed into law 22 May 2009
- Director, Systems Engineering on board 21 Sep 2009
- Implementing DTM signed by USD(AT&L) 4 Dec 2009; Acquisition Guidance on-line 31 Jan 2010
- DoD Directive formalizing responsibilities of Director, Systems Engineering in development
- First annual WSARA SE / DT&E Joint Report delivered to Congress 31 Mar 2010

President Barack Obama hands a pen to U.S. Rep. Robert Andrews (D-NJ) as he signs the Weapons Systems Acquisition Reform Act in the Rose Garden at the White House Friday, May 22, 2009. Standing from left are: Andrews, Rep. John McHugh (R-NY), Sen. Carl Levin (D-MI), Rep. Ike Skelton (D-MO) and Rep. Mike Conaway (R-TX). Official White House Photo by Samantha Appleton

MDAP- Major Defense Acquisition Program (USC 2430)

# Systems Engineering Mission

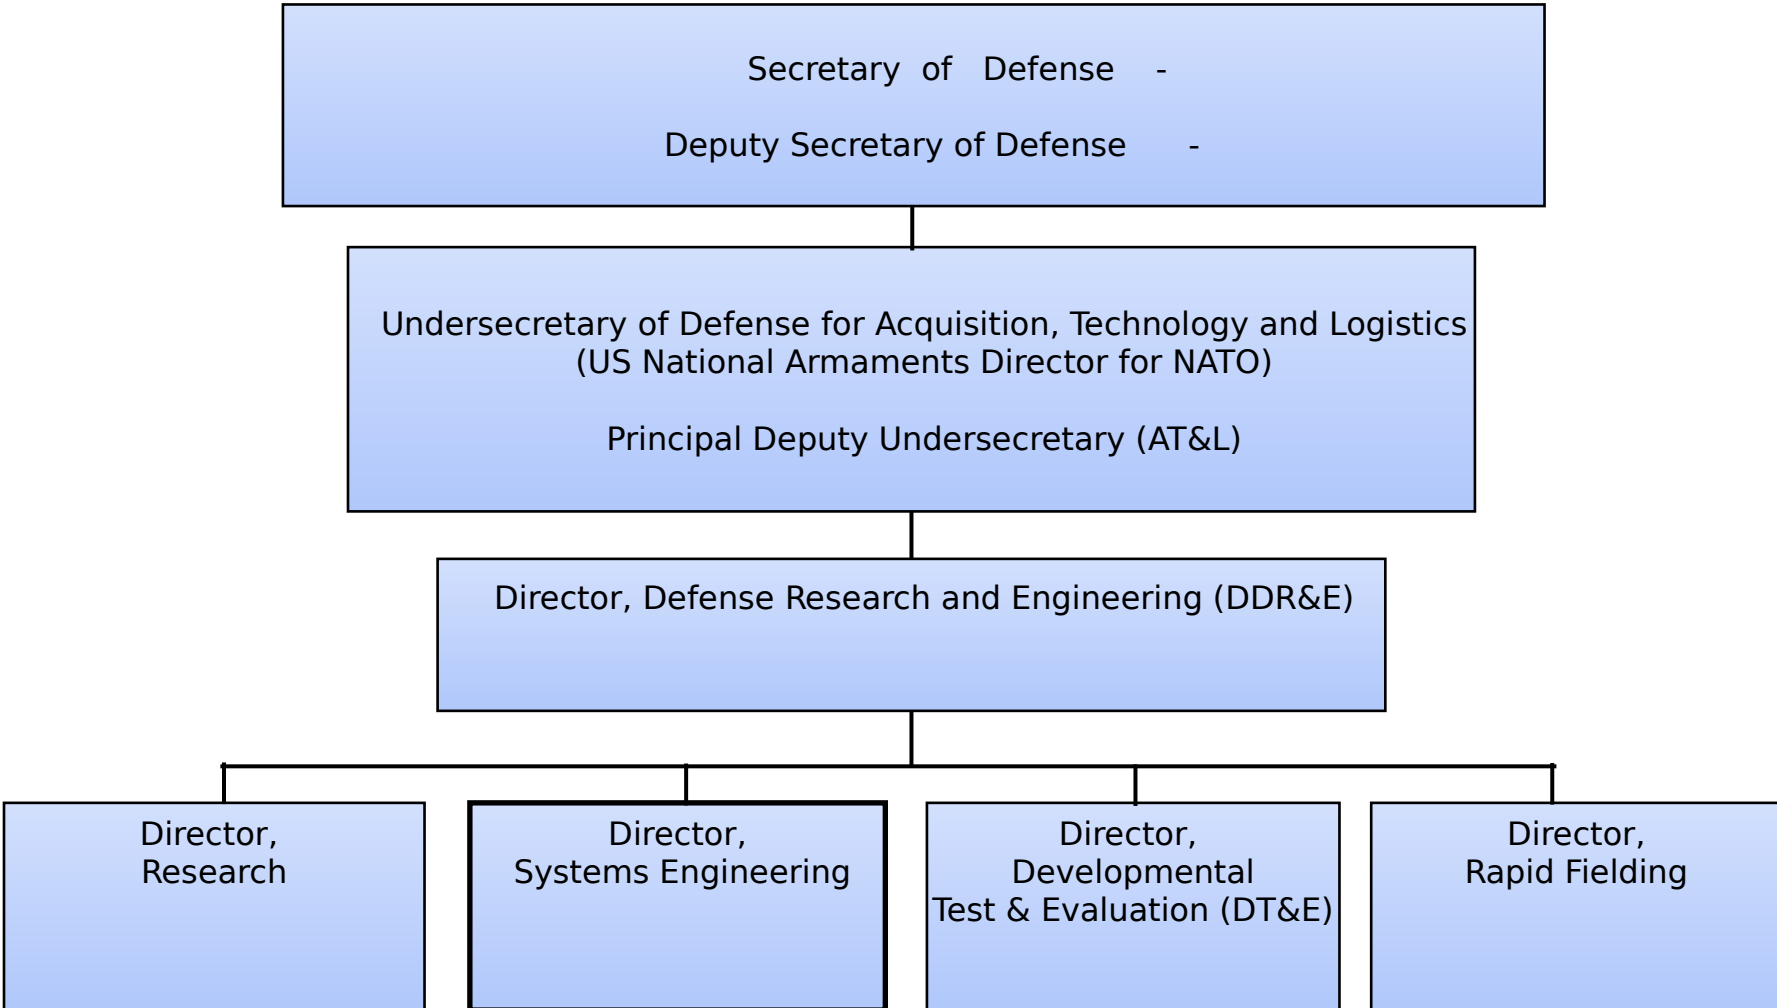

- We execute substantive technical engagement throughout the acquisition life cycle with major and selected acquisition efforts across DoD
- We apply best engineering practices to:
  - Help program managers identify and mitigate risks
  - Shape technical planning and management
  - Support and advocate for DoD Component initiatives
  - Provide technical insight to OSD stakeholders
  - Identify systemic issues for resolution above the program level
  - Support Knowledge Based Decision Making

We are the “E” in **DDR&E**

# US Department of Defense Organization

# Director, Systems Engineering

Director, Systems Engineering  
Principal Deputy

Systems Analysis

Major Program Support

Mission Assurance

**Addressing Emerging Challenges on the Frontiers of Systems Engineering**

- Analysis of Complex Systems/Systems of Systems
- Development Planning/Early SE
- Program Protection/Acquisition
- Cyber Security
- University and Industrial Engineering Research

**Supporting USD(AT&L) Decisions with Independent Engineering Expertise**

- Engineering Assessment / Mentoring of Major Defense Programs
- Program Support Reviews
- OIPT / DAB / ITAB Support
- Systems Engineering Plans
- Systemic Root Cause Analysis

**Leading Systems Engineering Practice in DoD and Industry**

- Systems Engineering Policy, Guidance, and Standards
- Specialty Engineering (System Safety, Reliability / Availability / Maintainability, Quality, Manufacturing, Producibility, Human Systems Integration (HSI))

Providing technical support and systems engineering leadership and oversight to USD(AT&L) in support of planned and ongoing acquisition programs

# Systems Engineering Contributions to Acquisition

- **Systems-level technical leadership**
- **Risk identification and management**
- **Interface management**
- **Life cycle focus**
- **Robust exploration of the need**
- **Achievable system design**
- **Integration of technical disciplines**

# SE Research Needs

- **Flexible system design**
  - Agile systems/products/architectures
  - Flexible systems engineering processes and methods
  - Capture agility, adaptability, responsiveness as design attributes
- **Education and Workforce accelerants: at individual, corporate and national levels**
- **Early systems engineering and development planning**
  - Melding of ops requirements with early systems engineering to highlight promising technical solutions: the “art of the possible”
- **Engineering System of Systems**
  - Addressing the challenge of complexity

# Challenges Ahead

- **Create the tools to enable Rapid Capability Delivery**
  - Shorten the time to deliver life-saving and war-winning technologies - without compromising SE integrity
- **Expand the aperture of SE to address 21st century technical challenges**
  - Security, software-intensive, etc...
- **Embrace complexity**
  - Systems of Systems / Complex Adaptive Systems / Emergent behaviors
- **Expand the SE human capital resource base**
  - Reflect new insights in curricula to grow the next “crop” of SE

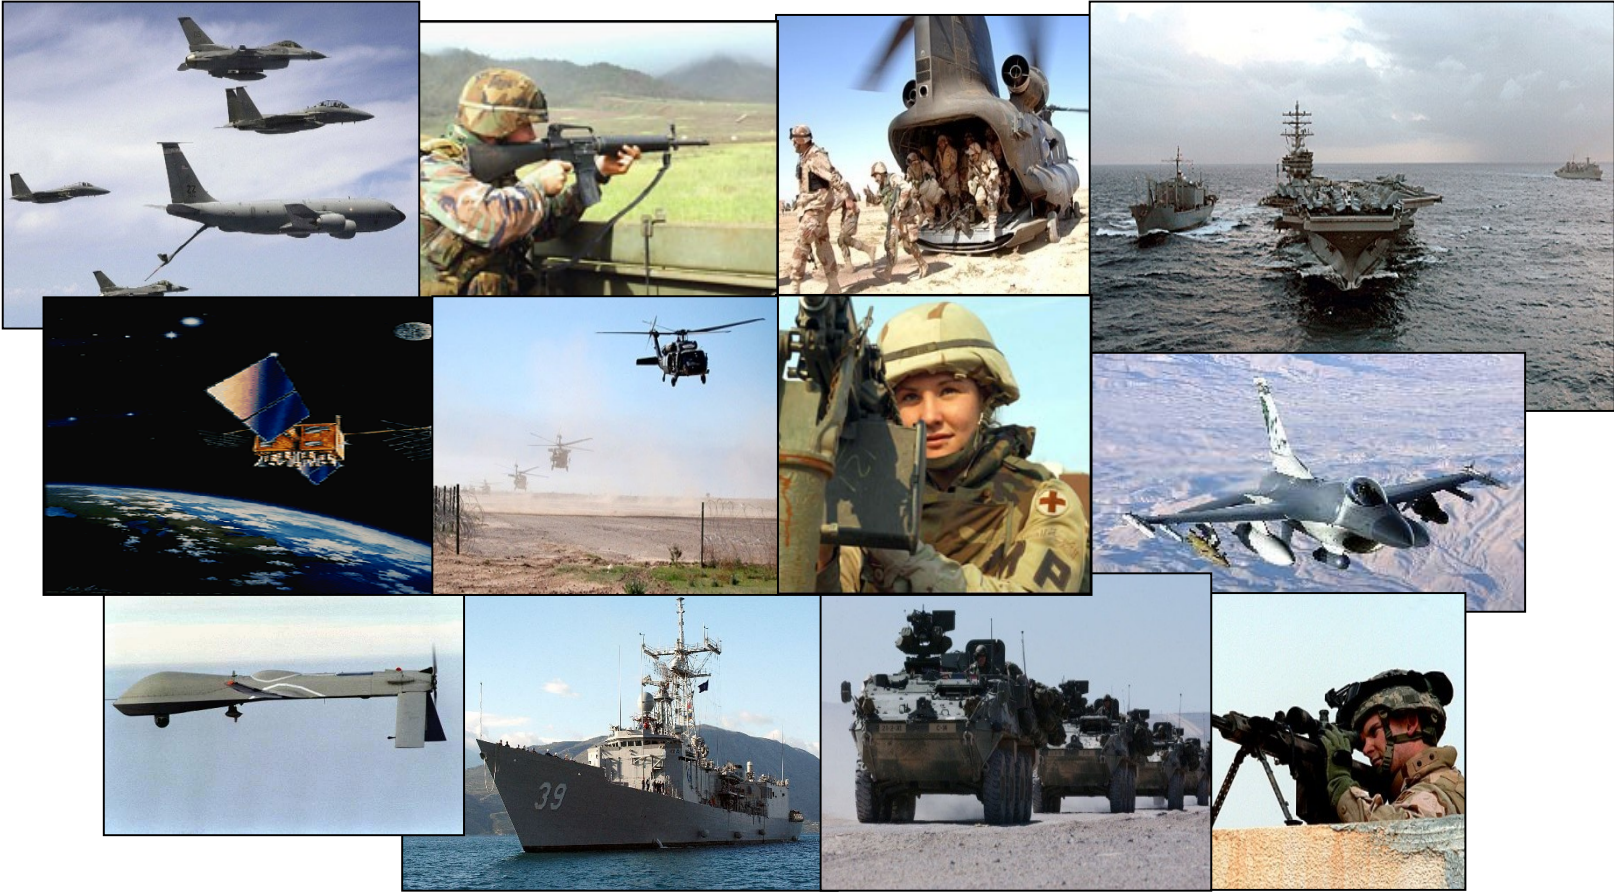

# Opportunities

- **Acquisition reform efforts have recognized criticality of strong Systems Engineering focus for program success**
  - ***Systems Engineering toolkit focused on identifying and managing risk - development risk, production risk and life-cycle***
- **Growing focus on addressing “early-acquisition” phases**
  - **requirements definition, development planning, and early acquisition systems engineering support**
  - ***Leading to more informed decisions at MS B***
- **Our development processes need to evolve to provide faster product cycles, more adaptable products and address emerging challenges**
- **Future US Defense capabilities depend on a capable US engineering workforce in and out of government**
  - ***Need to create opportunities to grow future “Engineering Heroes”***

# Systems Engineering: Critical to Program Success

*Innovation, Speed and Agility*
